ST. LOUIS CITY PUBLIC SCHOOLS OBTAIN DONATION OF EDUCATIONAL MATERIALS THROUGH UNITED VAN LINES' TRANSPORTATION OFFER

ST. LOUIS - Five hundred classrooms in the St. Louis City public school district will be receiving health and science educational kits thanks to St. Louis-based United Van Lines, which donated transportation services.

Explaining the workings of the heart and proper nutrition to a classroom may make it difficult for teachers to retain the students' attention. These educational kits deliver the message of fun, food, and fitness through videos, games, and worksheets. In addition, a teacher's guide is included to aid the teacher in presenting the materials.

"United is pleased to have helped bring these educational materials to our community," said Richard H. McClure, president and CEO of United Van Lines. "We know the St. Louis City system will benefit from using them within the classroom."

Loretha Allen, lead science supervisor of the St. Louis City public school district, praised the donation to the district.

"The combination of materials in this kit will help the children become interested in bettering their health," Allen said. "By using games and other entertaining methods, this resource helps the children to remain focused, as well as learn lessons they can continue to use throughout life."

St. Louis City Public School Receives Donation -- add one
