STAR MOVING SYSTEMS RELOCATES TO NEW FACILITY *Unique features give location many advantages*

REDMOND, Wash. -- Star Moving Systems, Inc., an agent for United Van Lines, has recently relocated from its Woodinville, Wash., location to a brand new facility in Redmond, Wash. The new address is 23060 NE 102nd Street.

The newly built state-of-the-art facility consists of 2,000 square feet of office space and 30,000 square feet of warehouse space. Located on 3.4 acres of property, the custom-built warehouse includes a specialty large covered loading dock for the rainy Seattle winter session and sophisticated dock levelers, which offer secure handling of goods. The pristine facility also boasts unique 35-foot high ceilings to allow better use of the space and for four-high storage container stacking. The property includes an 80-foot certified truck scale for public weighing, offering much appreciated convenience for truck drivers.

"All of us at Star Moving Systems are very proud of our gorgeous new facility," said Greg Powell, vice president of sales and marketing. "We've been anxiously awaiting the move in and are very excited that the time is here."

Star Moving Systems provides local, long distance, international moves for household goods, electronics and office equipment. Star also provides up-to-date methods for full-service storage. Headquartered in Tacoma, Wash., Star Moving Systems has been an agent for United Van Lines since 1950 and has been serving the transportation needs of the Pacific Northwest since its incorporation in 1890.

United Van Lines, with headquarters in suburban St. Louis, maintains a network of 1,000 affiliated agencies throughout the world. As the nation's largest mover, United holds more than 30 percent of the market, which is nearly double the market share of the second largest carrier. More information about United and its services is available at
